

Intellect launches Government Procurement eXchange Platform (iGPX) composed with eMACH.ai

Set to redefine public procurement: Leveraging AI and Open APIs for Efficiency, Transparency, Inclusivity, Compliance & Sustainability

Redefining procurement processes for the public sector, Intellect's AI-driven iGPX platform provides insightful analytics, strategic agility, and robust compliance to transform government & institutional procurement management

Delhi, India, July 4 2024: [Intellect Design Arena Ltd](#), a cloud-native, future-ready, multi-product FinTech company for the world's leading banking and insurance clients, announces the launch of the first-ever purpose-driven and ecosystem-focused open API-based public procurement platform - iGPX (Government Procurement eXchange). Composed with eMACH.ai - the largest, most comprehensive and innovative open finance platform - and engineered by the 'First Principles' Thinking along with embedded GenAI from Intellect's own Purple Fabric AI platform, iGPX promises enhanced efficiency, deep transparency, unparalleled inclusivity, vigilant compliance & global sustainability.

According to World Bank analysts, Governments spend an estimated \$13 trillion each year on public contracts for goods, services, and public works. As much as a quarter of that is wasted in inefficient or shortsighted procurement practices. Halting the waste could free up at least \$1 trillion and up to a whopping \$4 trillion a year to put economies on a path toward green, resilient, and inclusive development¹. With public welfare at the core, the iGPX seamlessly embeds expert AI agents for governments & public institutions to excel in their core objectives through:

- a) Best Price through rich product & services listing, price reasonability algorithms & demand aggregation
- b) Reduction in procurement cycle time up to 95% through 100+ procurement variations, multi evaluation & consignee options
- c) Tailored procurement rules and transparent bidding practices supported with unbiased grievance redressal foster social & economic inclusivity to local sellers, SMEs & other communities.

iGPX is enriched by Intellect's experience of building and managing one of the largest public procurement marketplaces in the world for 6 years. With pre-built assets like 111 APIs and 17 microservices, iGPX drives significant value to clients by providing the ability to compose their own signature solution quickly.

Commenting on the launch, **Debanjan Kumar, CEO of iDTC** said, *"Intellect's launch of iGPX marks a transformative moment in public sector procurement that uniquely derives its growth from all interdependency among all actors in the ecosystem - the Buyers, Sellers, Logistic Providers, Financial Institutions, & others. World Bank has globally acknowledged the need for the private sector to play a much bigger role in the socially and environmentally responsible development of the planet, as an investor but equally as a source of innovation & expertise. iGPX is the exponent of innovation & expertise in public procurement that empowers governments & public institutions across the globe to achieve sustainable, inclusive, and cost-effective procurement practices globally."*

He further added, *"At Intellect, we are committed to driving innovation that enhances operational efficiencies and fosters a new era of strategic agility and financial stewardship in public administration. iGPX represents our dedication to harnessing cutting-edge AI technologies to deliver measurable impact, enabling governments to navigate evolving regulatory landscapes and achieve significant savings while promoting economic resilience and equitable growth."*

About Intellect Design Arena Limited

Intellect Design Arena Ltd is a cloud-native, future-ready, multi-product Enterprise FinTech Company for the world’s leading banks, insurance, wealth, capital markets, procurement and accounts payable. With over three decades of domain expertise, Intellect is the brand that institutions rely on for digital transformation initiatives.
